MilesNelsonNZ

Founded in 1928, Miles Nelson is one of New Zealand's most trusted hardware companies and is proud to be 100% privately New Zealand owned and operated.

Based in Auckland, Miles Nelson distributes nationwide and internationally, and is well known for its quality product range, innovative design, and commitment to customer service.

Miles Nelson's long history as a manufacturer, coupled with in house technical expertise and custom designed proprietary products means that our range is specifically designed and manufactured to suit the New Zealand market.

The use of quality materials, along with a range of high-quality finishes and a suite of styles, makes the Miles Nelson range the ideal choice for commercial and residential projects.

Miles Nelson®

PROUDLY NZ OWNED & OPERATED

Contents

Miles Nelson offers a comprehensive range of residential and commercial architectural hardware products:

Things to Consider

Types of door functions

Entrance
Exterior doors – internal locking with turn or button, key access from outside.

Deadbolt
Single cylinder key and turn or double cylinder key locking from both sides of the door.

Passage
For general interior or hallway doors (non-locking operation).

Privacy
For bedroom or bathroom doors (internal locking, emergency access from outside).

Dummy
For wardrobe and cupboard doors (fixed lever).

Thickness of the door

Most interior door thicknesses range from 33-40mm. Exterior door thicknesses are between 40-45mm.

Both Milano & S-Range are suitable for door thickness: 32-45mm

If your door's thickness differs from these standards, you may need to purchase conversion components to ensure the hardware will work with your door.

Milano Drill Template
- 25mm hole plus 2x 7mm fixing holes
- 55mm Round or square rosette
- Door thickness 32-45mm
- Backset 60mm
- 25mm latch hole

S-Range Drill Template
- 54mm hole
- 65mm Round or square rosette
- Door thickness 32-45mm
- Adjustable backset 60-70mm
- 25mm latch hole

Door handing

Please note that some products are handed to suit right or left hand opening doors.

RIGHT HAND
Hinges on left, opens inward

LEFT HAND
Hinges on right, opens inward

RIGHT HANDED HANDLE

LEFT HANDED HANDLE

Stand on the secure side of the door (where you would insert your key, or an unlocking tool if it was a privacy set). For interior doors you should stand on the side that you would enter from i.e. In the hall if opening a hall cupboard door, in the bedroom if the door opens to an ensuite, in the hall if opening into a living room.

Replacing hardware

If you are looking to replace hardware on an existing door, or a door with predrilled holes, you'll need to measure the diameter of the holes and make sure that the hardware rosette will cover the openings.

Measure the backset: the distance from the door edge to the centre of the handle or key barrel and the width of the door stile: which is the vertical panel at the edge of a frame and glass panel door, where the door hardware is installed.

The width of the door stile is important when selecting a lock or handle with the correct backset, particularly if the door is paneled as this reduces the available area to install hardware.

BACKSET

STILE
Use the Passage set drill templates to determine if your existing holes and markings will suit the Milano and/or S-Range.

Miles Nelson Common Finishes Glossary

Door hardware and window fittings are available in a variety of styles and finishes so you can choose a style that complements your home, as well as the finishes on other hardware and light fixtures.

When choosing a finish, keep in mind that oil-rubbed bronze, antique bronze and copper are all living finishes that will change over time. Polished brass can tarnish if used outside, to avoid tarnishing it is best to keep it clean and wax it lightly with an appropriate product. Another exterior option to consider is stainless steel.

There are two standard grades of stainless steel: 304 for exterior use in non-coastal areas and 316 for exterior use in properties within 500m of the ocean.

This is especially important to consider in New Zealand with our close proximity to the ocean. Stainless steel can also be cleaned using an appropriate cleaner.

For a clean, contemporary look we also offer the recently launched range of entry and internal door hardware and door stops in a matt black finish.

Please refer to the common finishes glossary below and listed with each product when making your selection.

Finish	Code	Finish	Code
Black Chrome	BC	Powder Coat White	PW
Brass Finish	BR	Satin Anodised	SA
Chrome Plate	CP	Satin Chrome	SC
Copper	CU	Satin Graphite	SG
Florentine Bronze	FB	Satin Nickel	SN
Gold	GD	Stainless Steel	SS
Matt Black	MB	Uncoated Raw Material	RW
Polished Stainless Steel	PS		

D-Lock

S-Range

Sara Lever

⌀ **65mm Rose**
54mm hole

Ideal for **DIY** retrofit

S-Range
Satin Chrome

Shiloh Lever

⌀ **65mm Rose**
54mm hole

Ideal for **DIY** retrofit

The S-Range consists of a collection of contemporary lever designs in trendy finishes. Together with a unique interlocking system the S-Range provides a quality durable handle solution.

The base rosette is 65mm in diameter, making it an ideal handle for a retro-fit /DIY job, covering existing holes and marks. The range comes standard with a round rosette cover, however a matching square rosette is also available to purchase as an accessory.

All lever styles are available in:

Passage Set	Includes lever set (furniture only) and tubular latch
Integrated Privacy Set	Includes privacy lever set and privacy tubular latch
Dummy Handle	Includes dummy lever and taylor spindle (one handle only)

- S-Range handles are non-handed and fit both left and right handed doors
- Fits 54mm existing hole sizes. Ideal for retro fits
- The Integrated Privacy Set has an auto release function that deactivates the lock by simply pushing the inside handle down.

DURABLE ELECTROPLATED FINISH

The Matt Black and Satin Graphite finishes are electro plated, giving a durable, long lasting finish.

The revolutionary Lumos® LED bannister bracket seamlessly blends function and design by providing lighting within a bannister or railing bracket body.

This development simplifies the installation of safety or railing illumination into one stylish bracket.

The brackets use low energy consumption LED bulbs with a life of approximately 12 years under continuous use. The light does not produce heat and is therefore safe to touch. Recommended bracket spacing is 900mm, as light coverage area at maximum height is 900mm. One transformer can power up to 16 brackets containing LEDs.

Requires the use of a Miles Nelson regulated power transformer, supplied separately. Complies with BIA acceptable solution D1/AS1. Can also be used with photosensitive sensors for night lighting.

Lumos Brackets are designed and manufactured in New Zealand.

- Lumos® bannister bracket
- 12 volt LED downlight
- Very low power consumption
- Cool running
- Adapter for flat profile rails
- Concealed fixing
- Fixings supplied

The **5000 series mortise locks** have a 25 year mechanical warranty. The fire icon indicates a lock body that has been tested on a range of timber and mineral core doors. Check with your Miles Nelson representative for more information on fire ratings.

The **hydraulic 8000 series door closers** are an aluminium body finish and have a 10 year warranty. Products on this page with the fire icon have been tested on a range of timber and mineral core approved fire doors. Contact Miles Nelson for more information or check door manufacturers approved lists.

Warranty information

3 YEAR WARRANTY

Products covered: Electronic entry and deadbolt. MN9000L, MN9000R, MN9001L and MN9001R.

All electrical and electronic components used in Miles Nelson range of products excluding batteries are guaranteed for a period of 3 years from the date of proof of purchase, unless otherwise stated.

Miles Nelson assumes no liability under the warranty for the following:

1. Improper installation or failure to follow fitting instructions.
2. Failure due to improper maintenance.
3. Fair wear and tear.
4. Indirect or consequential loss or damage.
5. Cost of removal and / or replacement.
6. Cost of freight and / or travelling time.
7. Damage to or deterioration of plated finishes (soft finishes) or finishes exposed to a corrosive environment. As deterioration is possible under some environmental conditions.
8. Any modification or repairs to a product, as supplied unless authorised by Miles Nelson.
9. Use of replacement parts other than authorised parts.
10. Malfunction or failure of the product due to the use of non-genuine Miles Nelson parts.

5 YEAR WARRANTY

Products covered: All General Hardware Products including Bannister Brackets, Bathroom Fittings, Cabinet Hardware & Handles, Cabin Hooks, Door Fittings, Door Stops, Hinges, Hooks, Kickplates, Push Plates, Grab Rails, Letterbox Letters & Numbers, Neck Bolts, Security Fittings (excluding the Patio Bolts, Mini Bolts, Restrictor Stays and Security Window Stays) and Socket Bolts.

These products are warranted to be free from mechanical and workmanship defects for 5 years from the original date of purchase.

If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

Likewise the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson have no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

10 YEAR MILES NELSON WARRANTY

Products covered: Miles Nelson Commercial Door Furniture, Miles Nelson Commercial Door Closers, Door Handles & Pulls, Restrictor Stays, Security Window Stays, Patio Bolts and Mini Bolts.

These products are warranted to be free from workmanship defects for 10 years from the original date of purchase. If a defect is detected simply return the product together with proof of purchase to the supplier for replacement. Products are designed for interior residential applications, unless otherwise stated.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of ammoniated detergents, metal polishes, solvents, corrosive environments or other abrasive agents or scratching from keys is not considered a defect in the finish and as such is not covered by the warranty.

Likewise, the warranty does not cover damage caused by incorrect installation, accident, neglect or other factors over which Miles Nelson have no control and as such Miles Nelson shall not be held liable for any losses or expenses such as loss of use, damage to property or consequential damages or expenses.

10 YEAR MECHANICAL WARRANTY

Products covered: S Range and Milano door handles.

These products are warranted to be free from mechanical and workmanship defects for 10 years from the original date of purchase. If a mechanical defect occurs simply return the product together with proof of purchase to point of purchase for replacement.

This warranty does not cover the finish, defects or damage arising from improper installation, incorrect product application, improper maintenance, storage, shipping, handling or normal wear and tear or products used in commercial applications as "Commercial" is defined as any application other than those found on private residences.

25 YEAR MECHANICAL WARRANTY

Miles Nelson Manufacturing Ltd guarantees its products against defects in workmanship and materials. Should the product develop fault within its normal working life, Miles Nelson will repair or replace product of the same or equivalent product free of charge. Miles Nelson Manufacturing Ltd assumes no liability under this guarantee for the following.

1. Incorrect installation or failure to follow instructions.
2. Failure through improper maintenance or fair wear and tear.
3. Loss or damage costs incurred either indirect or consequential.
4. Cost of removal, replacement, and/or travelling time.
5. Any modification to the product from its original supplied operation design.
6. Plated finishes deterioration under some climatic conditions or chemical environment are exempt from this guarantee.

Miles Nelson Manufacturing Ltd reserves the right to determine whether or not any fault is caused by defects in workmanship or that any product is defective. Product specification and design improvement may change as a result of our continued commitment to quality, materials and development program. Consumer Guarantees act does not apply.

CU Copper Maintenance

While copper is extremely aesthetically pleasing, it also has an inherent ability to kill a wide range of harmful microbes relatively rapidly – often within two hours or less which makes it the perfect metal to use on a door with a lot of use. This plus its durability makes it perfectly suited to New Zealand's coastal environment and will last a lifetime. The natural tendency of the 100% hand finished pure copper is to show its perfect imperfections, a realness that will age organically over time. This ageing process can give a sense of life and history to the hardware.

Over time the surface may deteriorate if exposed to adverse atmospheric conditions caused by sea, air and weather. Finish deterioration caused by exposure to adverse atmospheric conditions or occurring from the use of paints, solvents, acid cleaners or scratching from keys is not considered a defect in the finish and is not covered by the warranty conditions.

However, if the "as new" look is desired, then maintenance with an approved cleaner will ensure the mirror finish will always be maintained.

Clean regularly using Brasso or something similar with a soft cloth or soft brush. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.

B BRASS LIFETIME GUARANTEE

The lifetime warranty covers the integrity of the product(s) base material and as such the product is guaranteed to be free from material defects for the lifetime of the product.

The product finish is subject to the same conditions that apply to the 5 year warranty, as above.

304 QUALITY STAINLESS STEEL

316 MARINE GRADE STAINLESS STEEL

S QUALITY STAINLESS STEEL

There are two types of stainless steel commonly used in the hardware industry, 304 grade and 316 (marine) grade. 316 grade stainless has molybdenum as an additive that improves its resistance to pitting and corrosion and should be used when exposed to seaside conditions.

With a little bit of care you can minimise, if not prevent tea staining and get years of visual enjoyment from your stainless steel.

Tea staining can be described as: discolouration of the surface of stainless steel that does not affect the structural integrity or the longevity of the material. Tea staining of stainless steels occurs most commonly in coastal areas and becomes progressively worse the closer you get to water (note that most of New Zealand is considered a coastal area). Other factors such as pollution, higher temperatures and humidity can also increase the effect.

To prevent tea staining, perform regular maintenance – Wash regularly with clean fresh water, mild detergent and a cloth or soft brush. After washing rinse in clean water and wipe the surface dry with a soft absorbent cloth remembering to go with the grain on brushed stainless steel. Generally, you should wash your stainless steel every time you wash your windows or every three months. Do not use abrasive cleaners or a scouring pad of any type as they may cause excessive wear and dull the finish.
