RETHINK SPECS

Allegion's Overtur™ is a cloud-based suite of tools that enables architects and door hardware consultants to come together and collaborate on the specifications and security design of doors and openings.

Overtur provides a variety of apps to accomplish such tasks as:

Review designs
in a real-time
online environment

Transfer door data
– including electrical
requirements

Upload door data,
schedule and plans
directly from BIM

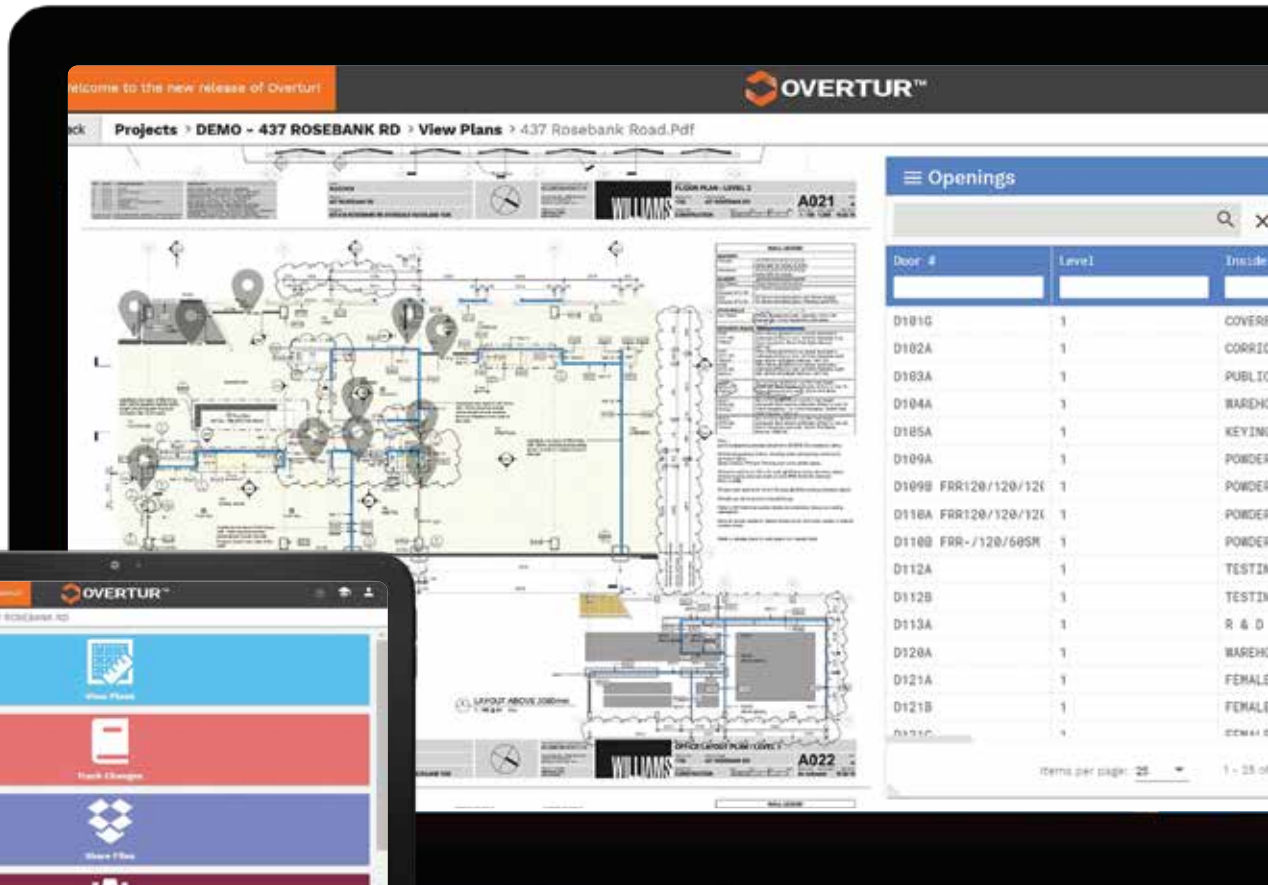

Graphically track
and review changes

Improved collaboration, coordination and productivity. Overtur is designed to simplify the process of specifying door hardware for your next project.

To learn more, visit allegion.co.nz/overtur

OVERTUR™

ALLEGION™

Introduction

With the ever-increasing technical complexity of building, fire, and disability code compliance, it is more important than ever to specify the appropriate products for security and life-safety.

Allegion creates value by securing people and assets with seamless access wherever they reside, work, and thrive. Let our team of technically trained consultants assist you with product specification and door hardware scheduling to ensure appropriate compliance codes are met.

We have sales offices located in Auckland, Wellington, and Christchurch. We would be happy to discuss any project requirements you may have.

Total solutions

Independently or as an integrated total solution, we can tailor any door hardware schedule to suit your individual security and safety needs for business or home.

Briton – Digital locks, door closers, emergency exit devices, fire door controls, floor springs, pivot sets, transom closers

FSH – Electric strikes, electromagnetic locks and hold open devices, electric drop bolts, electronic cabinet locks

Eco Schulte – Auto swing door operators

Ives and Glynn-Johnson – Door coordinators, general hardware, pivot sets, overhead stops and holders

LCN – Mechanical and electronic door closers, fire door controls

Legge – Door furniture, locks and latches, general hardware, hinges

Schlage – Electronic locks, door furniture, entrance handles, general hardware, keying systems, locks and latches, access control readers, and credentials

Von Duprin – Emergency exit devices, electronic door control products, electric strikes, exit devices, and power supplies

Leading the pack, keeping it local

It is imperative for homes and businesses to have contemporary, quality security hardware solutions. At Allegion, we take our leadership in the industry seriously and pride ourselves on being a local manufacturer, continually developing contemporary products to meet the needs of New Zealanders.

To further set us apart in the market, we offer an extensive selection of special finishes to complement architectural designs with a fully automated, leading edge electroplating plant.

With Allegion, you can be assured your door hardware specification combines innovation with style from start to finish.

Designed &
Assembled

ALLEGION™

Allegion products are not only designed to complete your architectural vision, but also to suit the operational and security needs of a facility for seamless access.

We offer an extensive range of mechanical and electronic hardware and our experienced team can help you specify the right products to meet all your operational building requirements.

When you partner with Allegion, you receive:

- **Easy collaboration with Overtur**
Our cloud-based ecosystem allows project team members to collaborate on specifications, design, and construction of door security and openings.
- **Market leading warranties**
We offer some of the best mechanical warranties in the market, and our 10-year mechanical warranty period is extended to 15 years for Matrix+ partners.
- **Accurate and detailed specifications**
Our specification team are experts in their field. Fully qualified and with over 50 years' of combined experience, we guarantee accuracy.
- **Experts across the regions**
With consultants across the country, you have one point of contact for all your interactions with Allegion.
- **NZ made innovative products**
Our local manufacturing and engineering capability are fit for purpose and gives the flexibility of late configuration.

How we can help

- Hardware specifications
- Door-by-door schedules
- Product elevations
- Substitution request reviews
- Hardware submittals reviews
- Comprehensive product training
- Building, life-safety, and accessibility codes compliance
- Job site reviews and pre and post installation inspections

Getting started

Contact us and we'll connect you with an Allegion consultant in your area.

To get started, please share with us a copy of the following:

- Architectural floor plans
- Door and frame elevations
- Door schedule/details
- Any known requirements

Allegion serves the access and security needs of various projects, including commercial real estate, aged care facilities, hospitality, apartments, tertiary institutions, schools, government, and healthcare. We understand the practical and regulatory requirements for each market and have an experienced team to assist you in specifying compliant and functional door hardware solutions.

Aged Care

Aged care facilities have unique requirements that differ across each project and application. Accessibility is a key consideration, including visual disabilities where the colour of the door and the door lever must have visual contrast as per the building code. To enhance user functionality, cam action door closers help users by reducing the force required to open the door. Style is also important for these projects, and our range of special finishes provides options to enhance visual aesthetics of a project.

Commercial / Retail

Products specified for commercial buildings need to be robust and suitable for heavy use. We can specify both interior and exterior products in marine grade stainless steel. Style is another key consideration and we have a range of durable products available in special finishes to suit your design needs. Security and electronic access options are also available. We understand the accessibility and fire code compliance requirements and can create schedules specifically for your project needs.

Hospitality

Style is a key consideration in hospitality projects that also have fire and accessibility compliance requirements. Allegion has products to meet both needs with our range of levers with the required accessibility design in 7 different special finishes. Necessary unique access control requirements are met by our digital lock solutions, such as Schlage eGO or Schlage Omnia.

Apartments

Apartment buildings have requirements that vary depending on the intended customers and use. Some situations may or may not require accessible door hardware, however our team of experts will ensure you get a compliant specification to suit your project. We have a range of electronic entry solutions that will allow you to differentiate your offering to potential buyers. The Schlage Omnia, for example, is a fire rated smart lock perfect for use in apartment buildings. Special finishes are also an opportunity to upgrade your project and provide a unique selling point to customers.

Education

Primary, secondary, and tertiary institutions have very different access and security requirements. The users of these building types are diverse, varying from small children to adults and those with and without accessibility requirements. For example, master keying is a service we provide for many primary or secondary construction projects, whereas tertiary institutions often require full electronic access solutions. Allegion assists with specification and scheduling to ensure accessibility, fire, and emergency evacuation compliance regulations are met.

Healthcare

The physical environment of a healthcare facility is the foundation of all that occurs in it. We believe optimising a healthcare facility's physical environment can have a direct link to improved patient health and safety. It also ensures physician and staff safety, security and performance; increasing operational efficiencies and financial outcomes.

Electronic Locks

Schlage Omnia Fire Rated Smart Lock

● Black ● Satin Nickel Plate

Fire rated

Accessible

Remote access
with Schlage Wi-Fi Bridge BZ100

Works with Schlage Breeze™ app

Virtual keys

Built-in alarm

Access with PIN, key tag or
fingerprint

Key override

Auto re-locking

Technical specifications

- Easily programmable with the Schlage Breeze App
- Use voice commands via Google Assistant and Amazon Alexa
- Touch screen keypad - up to 150 custom or scheduled pin codes
- Fingerprint scanner
- 1 year battery life (approximately 10 uses per day)
- Refer to page 14 for Schlage Breeze accessories

Dimensions

- External - 313mm (L) x 53mm (W) x 28mm (D)
- Internal - 310mm (L) x 53mm (W) x 3mm (D)

Certifications

- Fire rated: Product has been tested for use in fire doors. Refer to fire door manufacturer for approval.
- Accessibility: Compliant to the AS 1428:1-2009 Design for Access and Mobility

Warranty

- 2 year mechanical and electronic
- For finish warranties, please refer to allegion.co.nz/finisheswarranty

Schlage eGO Smart Hotel Lock

● Silver - Anodised Aluminium

Fire rated

PMS integration solution

Programming with Schlage Breeze™ Hotel

Access with PIN, key tag or fingerprint

Mobile access with Schlage Breeze™ Guest

Remote access with Schlage Wi-Fi Bridge BZ100

Technical specifications

- Operated with the Schlage Breeze Hotel app to manage virtual check-in or remote access
- Programmable cards or app-based access for fixed periods of time or days of the week
- App integration with existing PMS software via SDK/API
- Refer to page 14 for Schlage Breeze accessories

Battery

- 20,000 cycles (depending on operating conditions)

Certifications

- Fire rated: Product has been tested for use in fire doors. Refer to fire door manufacturer for approval.
- Accessibility: Compliant to the AS 1428:1-2009 Design for Access and Mobility

Warranty

- 2 year mechanical and electronic
- For finish warranties, please refer to allegion.co.nz/finisheswarranty

Schlage Wi-Fi Bridge
(BZ100)

Schlage Encoder
(BZ200)

Technical specifications

- Network: Wi-Fi 2.4GHz
- IEEE standard: 802.11 b/g/n
- Power interface: Type-C USB
- Power input: 5V/500mA

Wi Fi Bridge (BZ100)

- 70mm (L) x 70mm (W) x 20mm (D)

Encoder (BZ200)

- 70mm (L) x 70mm (W) x 26mm (D)
- Compatible with the Schlage Breeze Hotel system

Lock Compatibility

- Schlage Omnia™ Smart Lock
- Schlage eGO™ Smart Hotel Lock

Warranty

- 1 year electronic

Schlage Keypad Controller
(BZ300)

Schlage Lift Controller
(BZ400)

Technical specifications

Keypad Controller (BZ300)

- 125mm (L) x 79mm (W) x 15mm (D)
- Aluminium frame/tempered glass
- Bluetooth 4.1
- DC12V power supply
- 15mA standby current
- ~1A operating current
- ~1.5S unlocking time
- IP66 water level
- MIFARE M1 S50 card type
- App and IC card unlocking

Lift Controller (BZ400)

- Bluetooth 4.1
- Compatible with iOS7.0 or later / Android 4.3 smartphone or later
- 9-16V DC power supply
- 10 mA standby current, <400 mA working current
- MIFARE M1 S50 card type
- App and IC card unlocking

Lock Compatibility

- Schlage Omnia™ Smart Lock
- Schlage eGO™ Smart Hotel Lock

Warranty

- 1 year electronic

*Requires Handheld Device (HHD), sold separately

FSH FEL990 Series electric mortice lock

Technical specifications

- Vestibule and Combination lock
- Handing (left or right)
- Fail safe/secure adjustable on site

Door

- Metal or wood
- 32mm to 50mm thick (extended spindle for up to 65mm thickness available)

Backset

- 60mm standard
- 70mm
- 89mm
- 127mm

Models

- FEL990**
- Non-monitored

- FEL990M**
- Monitored

Monitoring

Monitored

- Door monitoring by reed switch
- Lock status monitoring by combination of locking bar, deadlatching lock, and locking parameters
- Dual key override monitoring (KOM)
- Request to exit (REX) via hub/handle(s)
- LED indication

Warranty

- 10 years mechanical
- 1 year electronic
- For finish warranties, please refer to allegion.co.nz/finisheswarranty

FSH MEM2400LP mechanical electromagnetic lock

Technical specifications

- Low power consumption
- Up to 1000kg holding force
- 12V/24V DC field selectable
- Full monitoring lock status sensor
- Door status sensor and warning alarm
- Light panel

Accessories

- Adjustable L bracket
- Mounting plate extension 15mm

Warranty

- 5 years mechanical
- 1 year electronic

FSH FEM3500 Series electromagnetic lock

Fire rated

Technical specifications

- Surface mount standard
- 280kg holding force
- 12V/24V DC field selectable
- Built-in varistor (MOV) surge protection
- CE/C-Tick
- No residual magnetism

Models

- FEM3500D**
- Double non-monitored
- FEM3500DM**
- Double monitored
- FEM3500**
- Single non-monitored
- FEM3500M**
- Single monitored
- FEM3500FM**
- Single flush mount

Accessories

- L and Z brackets for double FEM3500D and FEM3500DM universal
- L and Z brackets for single FEM3500 and FEM3500M universal
- FEM3500 bolt kit for 50mm thick doors

Warranty

- 5 years mechanical
- 1 year electronic

FSH VE1260 motorised drop bolt

Technical specifications

- High torque motor driven drop bolt with up to 35kg pre-load/side-load tolerance
- Up to 1000kg holding force
- Consumes an in-rush current of 290mA at 12V DC during locking/unlocking, 15mA at 12V DC while locked/unlocked
- 1A power supply required for full pre-load capability
- Round and square end models

Accessories

- Surface mount boxes
- 40mm strike plate to cater for +/- 12mm door misalignment with 45mm minimum door thickness, square end

Warranty

- 5 years mechanical
- 1 year electronic

Pull handles

The Schlage range of pull handles has been designed for residential and commercial applications. This comprises interior and exterior doors for use in retail, educational, institutional, governmental, medical, and public buildings, as well as residential homes.

The range includes both round and square tubular designs. Entrance handles can be fixed to timber, aluminium, and glass doors. They are designed with high quality 316 Marine Grade Stainless Steel to provide greater durability and minimise maintenance.

Schlage master keying

Most Schlage and Legge locks are supplied individually keyed. A well-designed keying system facilitates more control and increased security. Specially keyed systems have been developed to enable end users to assign access to individuals for locks they are authorised to operate. Lost ball construction keying is available.

Keyed to Differ (KD)

All keys are individual and stand alone. Each lock can only be opened by its own individual key.

Keyed Alike (KA)

The system allows a number of locks to be operated by the same key as they are keyed to a specific code. This system is particularly suitable for residential applications with front and back doors.

Master keyed

This keying system locks in a group to be keyed individually and does not allow those individual keys to operate any other lock in the system. However all locks in the system can be operated by one master key.

Grand master key

With this system, locks in several groups are independently keyed with a master key for each group. Each group is independent of each other, and the grand master key will work with all locks in all groups.

Maison keying

A maison key system is a keying system that allows a lock to be opened with a number of unique individual keys. Typically found in applications like apartment buildings, it provides unrestricted access to common doors. Unlike master keyed systems, the lack of security makes this a less attractive option.

Door controls

LCN 4031 & 4031T Series

4031 Series door closer
(Hold open arm shown)

4031T Series door closer

● Aluminium

● Dark Bronze

Accessible

Fire rated

Technical specifications

- Universal, fully reversible, non handed door closer
- Independent adjustable valves for backcheck, closing, and latching speeds
- Optional SRI primer for corrosive conditions
- High strength cast iron construction

● Satin Chrome Plate

Common terms

Backset

The distance from the edge of the door to the centre of the hole for the spindle/lever.

Classroom lock

Outside handle locked and unlocked by key. Inside handle always unlocked

Door preparation

The cut-outs or holes made to the door for the lock and/or lever being installed.

Door thickness

The measurement from outside face of the door to inside face of the door. All locks have a minimum/maximum door thickness.

Double cylinder deadbolt

Deadbolt thrown or retracted by the key from either side. Bolt automatically deadlocks when fully thrown.

Double cylinder deadlatch

Deadlocking latchbolt retracted by the key from either side. No hold-back feature

Mortice lock

A lock which is set within the body of a door in a recess or mortice, as opposed to one attached to the door surface.

Nightlatch

Deadlocking latchbolt retracted by the key from outside or by inside turn. Rotating turn and activating hold-back feature keeps latch retracted.

Single cylinder and turn deadbolt

Deadbolt thrown or retracted by the key from outside or by inside turn. Bolt automatically deadlocks when fully thrown.

Stile

The vertical edge of the door where door furniture is fixed. A thin stile, i.e. one with a glass pane near the edge of the door may have implications for which backset can be used.

Storeroom lock

Outside handle fixed. Entrance by key only. Inside handle always unlocked.

Technical compliance

Fire Rating:

Product has been tested for use in fire doors. Refer to fire door manufacturer for approval.

Accessibility:

Compliant to the AS 1428:1-2009 Design for Access and Mobility.

Caution: When door closers are installed and adjusted to meet reduced opening force requirements, there may be insufficient power to reliably close and latch the door, depending on prevailing operating conditions.

Electromagnetic compatibility:

Meets EN 61000-6-1 (emission) EN 61000-6-2 (immunity) standards.

Services

Scheduling

A comprehensive door schedule specification service is provided. Door hardware schedules are available with no obligation.

Master keying

Master Keying is a method of controlling access through a building. A key schedule is prepared from provided floor plans. It includes a key matrix, which locates keys and locks and their distribution and usability. Security is based on a system where one lock has its own key. This key will not operate any other locks in the property/building, however where all locks are in the same property/building the locks can be operated by the one master key.

Keyed Alike – KA

More than one lock being operated by the same key.

Keyed to Differ – KD

One lock is opened with a single key.

Product application classification

Residential and light duty

Moderate use. Typical applications include residential homes, apartments, and low traffic offices.

Commercial

Moderate to high traffic flow. Typical applications include classrooms, storerooms, entrance/fire applications.

Heavy duty

Excessive high usage/high security subject to abuse. Typical applications include prisons, stairwell doors, and air pressure differential.

Luxury at every turn

Highly favoured for architecturally designed homes and commercial projects, Legge's Luxe. portfolio includes a total of 10 luxurious finishes with a range of 10 lever and 7 plate designs.

The New Zealand designed and assembled Legge Luxe. collection is the perfect touch of luxury at every turn.
